Interpon D2525 Collection Anodic Powder Coatings for Metal Architecture

AkzoNobel
Tomorrow's Answers Today

Interpon D2525 Collection Anodic

AkzoNobel Powder Coatings present this exclusive range of anodic colours. These attractive matt and metallic effect finishes provide a great alternative to anodised aluminium. **Collection Anodic** colours are supplied in **Interpon D2525** ultra-durable polyester technology to give long service life.

Benefits compared with other finishes for aluminium include:

- Easy repair of coating damage during fabrication or installation
- Proven long-term resistance to weathering – with a guarantee*
- Minimal environmental impact

Ask your local AkzoNobel Powder Coatings office for sample panels or further information.

*Guarantees subject to special terms and conditions.

AkzoNobel Powder Coatings présente cette gamme de coloris anodiques exclusive. Ces produits de finition au bel effet mat et métallisé remplacent magnifiquement l'aluminium anodisé. Les coloris de la **Collection Anodic** sont proposés en revêtement polyester ultra-durable **Interpon D2525** pour des années de tranquillité.

Par rapport aux autres produits de finition pour l'aluminium, cette gamme présente plusieurs avantages :

- Réparation aisée du revêtement s'il a été endommagé pendant la fabrication ou l'installation
- Résistance aux intempéries de longue durée prouvée – et garantie*
- Impact minimal sur l'environnement

Pour obtenir des échantillons ou pour tout complément d'information, adressez-vous à votre représentant AkzoNobel Powder Coatings local.

*Garantie conditionnelle.

AkzoNobel Powder Coatings presenta la gamma esclusiva di colori "a effetto anodizzato": attraenti finiture dall'aspetto metallizzato-opaco che si propongono come grande alternativa all'alluminio anodizzato. I colori della **Collection Anodic** sono forniti nella tecnologia poliestere ultra durevole **Interpon D2525** per offrire una prestazione di lunga durata.

Una collezione con indubbi vantaggi, tra cui, rispetto ad altre finiture per alluminio:

- facile riparazione di danni al rivestimento occorsi durante il processo di fabbricazione o d'installazione;
- provata resistenza all'invecchiamento nel lungo termine corredata da garanzia*;
- minimo impatto sull'ambiente.

Chiedete dei pannelli campione o ulteriori informazioni all'ufficio locale di AkzoNobel Powder Coatings.

*Garanzie soggette a specifici termini e condizioni.

AkzoNobel Powder Coatings stellt eine, exklusive Palette mit Eloxal-Farbtönen vor. Die attraktiven Matt- und Metalleffekt-Lacke der **Interpon Collection Anodic** sind eine ausgezeichnete Alternative zu eloxiertem Aluminium – formuliert in der hochwitterungsbeständigen Polyestertechnologie **Interpon D2525**, die eine lange Haltbarkeit der Beschichtungen gewährleistet.

Die Vorteile gegenüber anderen Aluminiumoberflächen sind:

- Einfache Reparatur von Beschichtungsschäden bei Herstellung oder Montage
- Bewährte lange Witterungsbeständigkeit – mit Garantie*
- Minimale Umweltauswirkungen

Musterbleche und weitere Informationen erhalten Sie auf Anfrage bei Ihrer örtlichen Niederlassung von AkzoNobel Powder Coatings.

*Die Garantie unterliegt bestimmten Bedingungen.

AkzoNobel Powder Coatings presenta una esclusiva gama de colores "Efecto anodizado". Estos atractivos acabados con efecto metálico y mate constituyen una excelente alternativa al aluminio anodizado. Los colores **Collection Anodic** incorporan la tecnología **Interpon D2525** en poliéster ultradurable para ofrecer una alta durabilidad del producto.

Las ventajas de estos colores frente a otros acabados para aluminio son:

- Fácil reparación de posibles daños en el recubrimiento durante la fabricación o la instalación
- Resistencia probada a la intemperie a largo plazo con garantía*
- Impacto medioambiental bajo
